

Commentary from Established Scholars: A Man is Not a Tree - The Aftermath

Dr. Farid M. Shomali

Emeritus Doctor of Architecture

ABSTRACT

In 30 June 2020, Dr. Farid Shomali, an architect meditating on current religion debates and human behaviors, was the first person on planet earth to reject the burial of the body in a peer review condensed two pages research paper or manifesto. While people from all thoughts and religions; the educated, the intelligent, the illiterate, even the rich and the broke practiced or witnessed that, in site or in media, from the beginning of creation till now. His research paper: A man is not a tree will show you why GOD will never say to put people under the ground let alone cremate them, and how burial and cremation are deadly sins since GOD rejected it in his words, and practicing it will lead to complete destruction of Human thoughts and feelings. Then he tries to come up with his best solution. He is calling prohibiting burying and cremation the 11th commandment. The message must be spread to the entire world, so the Author encourages people to include his idea in religion debates, schoolbooks, university books, TVs, newspapers and manifestoes. Dr. Shomali while waiting for biblical institutions and all other religious institution in the whole world, to justify their position; telling us from where did they get this stupid and wrong idea called "burying" "you don't even bury a pencil, you bury a human!". Which is the most disgusting and stupid idea in the whole world that shows they got it wrong. He ask people to give him the Nobel peace prize for his research paper and if not the Templeton Prize or Pulitzer prize or at least a certificate from all of those recognized institutions and he also asks to announce June 30th 2020 a "no burial and no cremation day"- Note: no co-authors, Institutional or Influencers' interventions.

Key Words: Religion Debates, Biblical faith, Limitations, Second Commandment, Atheism, Cremation, burial, King James, Monads, Science, 11th commandment, The double slit experiment, Special and general relativity, Immortality, Mathematics of Data Structure, Deniers, New age atheist, Einstein, Leibniz, Mask, Donate, Hamiltonian Mechanics

INTRODUCTION

In the Journal of Research in Humanities and Social Sciences, DOI: 10.7176/RHSS/10-12-08 ISSN 2224-5766 (Paper) ISSN 2225-0484 (Online) Vol.10, No.12, 2020 – Dr. Shomali wrote his famous paper: Commentary from Established Scholar: A man is not a tree. So kindly read it again in this research paper and read the added After-Math section from page 5 forward, and here I begin with the paper introduction:

If you are in the biblical faith; then you are waiting for the third day and more for resurrection. Can this be possible with cremation, burial underground and inside walls closed with cement before the third day and after? If you practiced that then you are either from the atheist

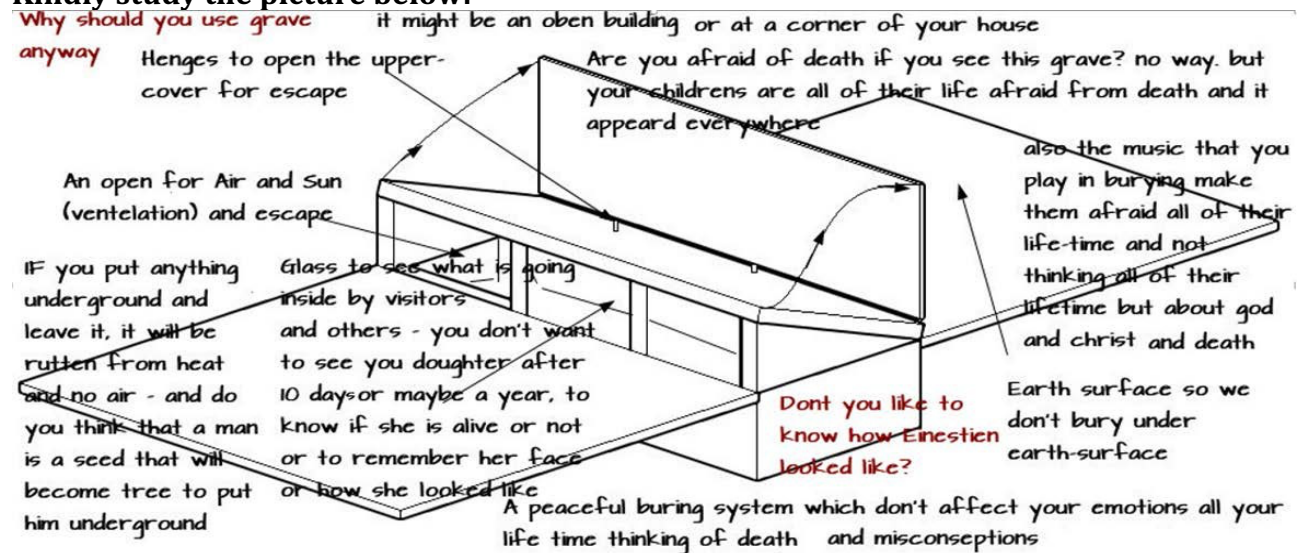

community, alternatively, you are from all the other current communities including biblical once who bury the dead and in this, you are all equal.

DISCUSSION

How do you know if we have to bury the dead or not as an atheist? Do you as an atheist do stupid things without knowing the consequences? Is there an experiment that you did in this regard? Do you as atheist know the truth to say whether to bury the dead or not? In addition, if you try to fight burial, cremation and any other similar ideology before you die as an atheist, knowing that this is the truth, then are you a liar when you say you are an atheist! Should we wait for the third day or more for faithful to the faith to know the validity of God's words? Do you have a voice to reject the burial idea if you knew that it is the truth! To conclude, burial and cremation are methods of keeping a person afraid all of his lifetime practiced by atheist and other religions including Biblical once. If your mother, son or daughter dies, do you put them underground the next days, if you take care of your child, his appearance and health all your lifetime then where is your mind when you put him underground the next days when he dies – and here we can see the failure!

Anybody can feel from god's plan and scriptures that cremation and burial by any means prohibited, 100% terror act and disrespectful. Thus must be announced to all the people of the world. You must know the unnecessary fear that your generations might went through all their lifetime from attending such act, maybe without consciousness. You all might have noticed it, and nobody can ever comprehend the meaning or reason for it unless he thinks something is wrong with the people practicing it. The message must be spread, and hope others can do it by their means; the best thing is to follow this rule to the end. Case closed, if you are an atheist you can never know if we have to bury the dead or not, so atheism failed completely, burring is stupid and it must be the 11th commandment if not the second one.

Kindly study the picture below:

This illustration; drawn by the Author, demands architects to find better solutions and designs for, not a safe kind of, graves or leaving grave limitations at all since you don't put bodies in the wild; towards using buildings containing our bodies. Prohibited if done in a very secure way by

any cost; in secure I mean: as in refrigerators, inside walls, inside boxes, inside safes, inside walls and underground or in a way that does not provides clear exit, access, ventilation, air, sun indirect exposure, light infiltration, clean environment and hygienic standards and complete visual access to the body. Showing emphasis on the effects of what you see, hear and experience on your ideas and habits. Conflicts produced by not following those rules, must be, prohibited, observed and fixed. Since if done or observed by only one person and the idea spread again will put people backward hundreds of years and more. Meaning that this habit must be: learned, informed, completely believed and reasoned as a commandment of God since reason says it is so. What just brought this subject up in the first place? What brought the subject up is the unnecessary fear, uncertainty habits that many may went through in their lifetime without conscious; you can notice that in half of you-tube videos talking about religion. I think this is the reason for that unnecessary fear, uncertainty habits and future regret. What is the solution then? In life, my-self, others, and I believe including yourself have abandoned many false ideas then went on with life forward and we have come a long way. What to hate are false ideas and uncertainty habits, not persons. Cremation and burial are false ideas and uncertainty habits that will stick with you all of your lifetime. Dust-to-dust (Genesis 3:19) must be examined since the New Testament rejected it. Do you take everything for granted!

(See previous picture) if a body buried in a grave, as in the attached picture you are not afraid about the dead and you are satisfied you did not do something wrong. Wait a minute, you might even think that you did something wrong putting the body in the wild, and you have to put him in a nice ventilated sunny building, Instead of the grave limitations, size and misery. To visit the dead maybe after 10 days or more, to be free from the fear of death and thinking about it all your life as you all do now. However, if one meter under the ground then you are afraid all of your lifetimes, ashamed all your lifetime thinking about it! As what is going on nowadays with many people who regretted putting their father, mother or relatives underground or did not bother to care about the consequences or giving it one thought. Not to forget to mention also the people who declare believing in resurrection and after life on earth, but do the opposite of what logic and reality implies to solve the situation. Strange how did not any person or human being in cemetery I visited here in Jordan; didn't thought of putting a glass on any of the graves, or to make the body easily accessible.

Did not reason, but putting it in the wild or restricted it to the stupid box. Have not thought about the way out proposed in this paper Then I figured it out; they say they know everything while they do not know everything They are deceived about the matter of death. They say they believe in resurrection but they don't, looking at us from above deceiving people while they are the wrong who did whatever they liked then bury.

CONCLUSIONS

This paper represents the author believes about the subject matter, and the author believes about what must be done to solve this crucial and important issue. We all must once, and for all. Immediately from this moment on, stop these two false ideas and go on. If you see these two acts done then do something about it, and inform others; for you should never think about it in the first place, burial and cremation are false ideas and heresies; rejecting burial and cremation, even if the body dissolves in front of your eyes is The Solution. Because it is not your problem, it is God's problem; stopping thinking about it to go forward is the way out. A man is not a tree, nor a seed to put him under the ground. Man must always be above the ground; if you saw

dissolved body then leave it alone, since it is not your problem and you cannot reason what to do about it without using the above-mentioned standards. To justify your reason or come with wrong reasons and fantasy ideas about it does have consequences and you saw it. The bible said that a man comes to life after 3 days if he believed in its words, in three days and more, so burial and cremation are prohibited; false ideas, uncertainty habits and future regrets.

The Aftermath

"When asked by someone what is your problem with the second commandment since he added it to the keywords of his research paper he replied: prohibiting burying and cremation is very important you should learn it as the 11th commandment, but its importance come in the second place after the first commandment" Dr. Shomali

It all began because I was happy with this latest research, so I decided to share it with the world, I decided to email it to a person I bought a software from long time ago as a present, so I wrote this in first email to him:

"Wanted to say thank you very much for your software, and as a present, I wanted to send you the latest research that I did, a two pages research, and it is the most genuine research that I did. A two pages research but it is the most genuine research on earth so far. I want you to stick to its principles. If you want to send me a present to my email, you can too. Tell me what would have happened to your body if I didn't sent you this research, and if it worth it or not"

This is an excerpt from my conversation with Mr. Oleg Kolbaskin; a software programmer of liteCAD, which I wanted to contact with, to know his reaction when knowing the truth that supposed to make him more enlightened, So he sent me the following questions:

Q: do you offer to keep dead bodies in houses instead of burying or cremation?

F.S.: Of course, first people, especially kids will stop being afraid of death and when kids ask where my dead father is; he can find him. Moreover, if there is sun and ventilation nothing will happen. People will have more stuff to think about than the burying process and you do not even bury a pencil, Do you! I am not saying that the biblical faith or any other faith is wrong; what I am saying is that this practice is wrong. You put a body under the ground how can you find it in the future, so the burial process is unnecessary but people should understand that and believe in that. First you stop thinking about the death since everybody will be kept safe above the ground; secondly if the bible is the truth since it stopped this act, and if there is resurrections, then we did it right; and when a boy ask where is his father he can visit him. When you want to know how Einstein or famous people looked like you will know. All the logic in the world says that this is the truth that burying is false.

There must be no boxes around the body what so ever, everybody can visit and see his dead parents or any other dead maybe after 5 years or 20 years. You feel safer you did not do anything wrong as when putting the body under the ground. How do you know that the body will not come to life after three days or a year or that its thinking is stopped no way that you will know, the body must be kept untouched to think all of its life time, what is your guide!

I see many people afraid and nervous and I think this is what burying has put in their minds.

Therefore, must be banned as soon as possible, and announced to all the people of the world. Everybody if he faces death; must be completely sure, that his body will be from the saved ones; that will not be buried under the Ground, but took care of, and this is the way out. In that some hate between people will stop since death is not important and you are not afraid of it anymore, not to bury is GOD solution.

I know that the people who have practiced burying before; did it out of their heart, love and respect! or maybe not. Thinking they are doing the right thing or maybe not, but it must be stopped because it is the completely a wrong and false thing to do. Unburying is a very much better and more elegant sophisticated, Intelligent, effective and Godly solution. You do not even put a glass or anything around the dead; he must always be above and untouched. With this we have succeeded and become worthy to be people of the 21 century who don't put bodies in the wild, or underground or hide them we are not ashamed of the body of Einstein to honor him by putting him underground or change it to dust, so you want to honor anyone keep him above the ground.

Tell me what is so great to put a body in a box, inside a (bag of trash) or as a dust. If you do not want it to put it under the ground then give it to others or me - what is great and we ought to be the great is to stay above the ground and not for people to see us as trash, unless we do something about it we are far from intelligent and far from people respect. I opened my heart to you and told you the truth that you should know - Do not think that I am stupid; all the people of the earth; from the beginning of creation. Did not come with such miraculous solution, I want you to make a questioner in your company and tell them do you want to be put under the ground or risen above the ground as the doctor said and you will get the answer you want.

Q: most of people live in cities, in many-floor buildings, in small apartments. There is no free ground around the buildings. So, where they must keep corpses of dead relatives?

F.S.: Great, as death is God idea so unburying is God idea. You are not meant to live alone and stop thinking. How can we achieve anything separated; without exchanging thoughts and fix errors. Wrong knowledge of god, and media deceiving you, have separated you and let you thought you are poorly restricted by the small apartment you live in. You have it all, you are free but your wrong ideas prohibiting you from achieving your goals, you can do it without burying what is stopping you, all GOD lands is yours why do you want to bury! See I proved you are wrong again.

Q: All lands near cities are someone's property, public or private. Nobody will let you to leave corpses where you want. May be possible to leave it somewhere in a wild lands, Hundreds kilometers from cities. Anyway, it will be illegal. You have to convey your idea to the government, in order they make it legal – to let corpses to decay in open air. Need to allocate special place in a city, like a cemetery, where it will be possible. Have you talked with government people in your country? What is their opinion? Btw, how many people you know who already follow the unburying idea and leave dead relatives on a ground?

F.S.: Governments are using scientist' ideas; who told you that the body decay, it does not decay 100%; you put it in the situation that makes it decay underground or on soil and water! If you put the body in a nice sunny and ventilated beautiful building, and let it wear nice thin clothes then nothing will ever happen to it because this is God idea. Me, the government are not the

ones to interfere in God idea; and cannot change it, this will always be the truth either you or me like it or not. Once again, you put the government above me, everyone else including yourself, your plans, all the people plans and God. Nobody yet until now followed this truth; but It is logical that anybody in the world will think about the burying one day in his life because it will happen to all of us and he must know the answer and the answer must be there somewhere and I gave you the best ever and the only solution and answer.

CONCLUSION

God never intended the man to be buried, or the body changed to Soil at all 100% truth. Dead body means a state of forever thinking, and meditating. Thinking about burying have Introduced bad effects on kids (autism) and people of the world (laziness) and I refuse to do what is logically wrong putting a person under the ground, inside walls, boxes, bags, refrigerator, cabinets or turn him to dust or sand or witness that. I believe that every person will know one day and feel that I am right and they are wrong regarding this issue. I believe that I must do what is right and do something about it either all the people or governments like it or not. I believe that I am not intended to hide the truths I know from someone sincere to know the truth. Therefore, everybody on earth now knows including your government that the end is in the grave because your people and your government created this situation but I am saying there are other alternatives outside of the grave as God intended. So the idea of unburying must be learned, believed and completely reasoned by all the people of the world

Q: Washington to allow human composting to turn dead bodies into soil, what do you think about this method. Is it same as yours?

<https://www.businessinsider.com/washington-state-human-compost-bodies-into-soil-2019-5>

F.S.: While cannot be compared to this stupidity. The truth I represent is far more genuine. The body, the minds are immortal, do you want to associate yourself with this! This is what you must answer, do you want to associate yourself with stupidity and foolishness, as you did before, or with authenticity and establishment! As to whom practiced, witnessed burial, cremation and Bag lifting without consideration I gave you the key out, two pages and the 11th commandment, as for those who went before me under the ground or to ashes putting their trusts in the untrusty I have no logical explanation of your destiny yet. As for those who are still alive I gave the 11th commandment, it is time to take the matter seriously it is not a game, if you cannot remember the shape and configuration, the body and face of the dead whether it is your father or daughter then this is un-logical. Are you dump! The Time has come to give the mind, body, logic and truth its truth and destiny

Q: I see that you are right in your ideas can you send me images about the way to do it?

The figure above is the beginning and am working in the complete drawings, I am happy to make people happier and solve this thing for good, the biggest problem, but the best thing to do right away is to make June 30st 2020 a "**no burial and no Cremation Day**"

Then what happened

Then I sent the question to "Sir Steve Ray" from the Catholic Church, the author of "Crossing the Tiber" and the author of CatholicConvert.com, to see his reaction as a theist person, so I sent him the following:

In the biblical faith burial and cremation and prohibited since the body and the mind are immortal. So why does the Catholic Church don't stop this stupid act and announce it to the world? Why the Catholic Church does that wrong act like all other religions and teaches it? You must not burry at all and leave the body above the surface of the earth accessible, don't remembering how your father shape and face look like is illogical - kindly answer as soon as possible

And he answers with this

I am not sure why you are asking me this question, and why you do not identify yourself or provide your name. Under these conditions, I usually ignore unnamed emails that appear out of the blue, without even a "Hello, how are you?"

But since I have a blog on this topic with an easy link to it, I will provide it to you. In the future, a little polite etiquette on your part will serve you well

Here is the link I mentioned. I forgot to add it to the previous e-mail:

<https://www.catholicconvert.com/blog/2018/05/15/a-quick-reply-to-question-about-cremation-and-scattering-the-ashes/>

Then I sent him an email titled "Sorry for being Rude, But out of Respect" and the body of this email was like this

Sorry for being rude, If I didn't care about you I would have left you alone, but you know the feeling when you want to tell something to someone you don't know but love to help them out but they don't care thinking they are right in everything and all others are wrong and stupid and didn't get it. You too have practiced that in your book "Crossing the Tiber". but I want to address this issue for all the people of the world, without having the capability that the catholic church have and it will be the biggest succeed and win for the catholic church history if they announce that to the world. To know that it is not a game to bury or cremate the body which is 100% deadly sin in the bible and un-respectful and god didn't put other people responsible for our burying.

We now know that this is the truth. All the religions of the world and all the people of the world are surely completely wrong and not intelligent in that. Then I am completely right with that and they must know that because what is wrong will always be wrong, if not fixed one day. Because I didn't want to forget you all with me thought I sent the solution that you all must know and deserve, to do it is the win and not to do it is the complete lost. You are doing bad, stupid, ignorant, unhealthy not so intelligent thing that made all the people leave your religion and a big deadly sin more horrible than killing, in promoting burial and cremation to kids that appeared everywhere in the shape of autism. Kindly read the attached file (I sent them my research) and you will know who am I and I am sure you know I am right. If you succeed in spreading this truth for you have more connections, all the people of the world will benefit including your families and this is enough for me. I only want one thing in return and I deserve it in the attached file.

CONCLUSION

Not only the body must not be buried or cremated, but also the blood and water or any substance inside it must not be taken out to keep it fresh for everlasting thinking, God didn't

put anyone responsible for playing with dead bodies, or put them under the ground or change them to dust, or take substance from them. I want an Imprimatur from the catholic church and your best spiritual temples about my research and this doctrine, I mean does this act works according to the catholic church teaching or against it, how can the Catholic Church not know the best answer for this fundamental question! What I mean by best answer is God answer, or have they not do the math yet, until now, they used the wrong math.

If the Catholic Church said that my research is the truth and works according to its understanding of the truth then the truth must be announced to all the people of the world and June 30st 2020 must become a **"no burial and no Cremation Day"**

Woo to them who practice burial or other felonies that God forbidden and teach that, who think of God as stupid to the degree that he left us alone, to forget about him and his solutions. Forget about God nobody will ever notice, laugh at them then bury, laugh at them then forget, and we have been in this miss and misery for a long time to change, no one knows this solution yet you are talking about. It is not relevant and so so difficult to know, practice, and comprehend. It is awkward and not easy to figure out or do. It really needs rocket science to come with such solution, that we did not figure it out before you oh doctor.

For when the deniers laugh or cry, think or shout then bury, or invite you to bury then teach them what the doctor said. Leave them alone to meditate, you have nothing more to do with them, and you also meditate, until this thing called burying must vanish from the minds of people and in reality and who did bury before must go now and you know your destination.

Destination to unbury. Teaching, that God perfect and only solution, not to be followed albeit known and not sufficient is the motto of the deceived ones. To teach that there is greater and wiser solution than of what God could provide is their agenda but they will never succeed and will never proceed, their destination will be the worst and to the grave they and their false Gods invented. So to save all from this I gave you the way out, the 11th commandment to meditate on and your last hope to escape the authority, misery and falsehood of the Grave and thinking about it all your life time. For always at the end the winners will be according to the scriptures, the prophets and the author of this document are the ones who will escape the Grave.

Therefore, Judeo-Christianity religion, and its followers biggest and only way to win and succeed, which didn't come yet and will never come unless they announce, teach and show to the world the main, real and so obvious truths and sound solutions that God did provide and insist on them as he did. The main sound truth and solution that all the people did not figure out yet in 2020, from the beginning of creation and must learn, practice and teach to their siblings and friends, is the 11th commandment which I gave you. To know both its authors, which teaches that the destination is always out of the Grave, and will never be to the Grave ever. Meaning that no more burial, cremation and bag lifting what so ever, even to non-Christian fellows. We will hold that in our souls and minds, that this truth will be inherited in our minds and hearts. Even if you see any dead body in front of you, Don't say again your failure and the ancestors failure words Abel, crow, naked, smell, dissolve and mercy on dead. Fight the devil and never bury. You ought after finding the unburying solution and maybe smell some of its author truth, to maybe win somehow. But while not practicing and embracing this truth and the other 10 truths and more, you will lose and maybe forever, and never ever examine the 11th

commandment and its two authors as you did with the 10 commandments and one of the two authors. For winning your life and immortality needs some tasks and precautions to do and they were always not lesser than 11 tasks to embrace.

Stop saying your two failure words donate organs. The great and the best are never afraid from death, weapons, attackers, sirens and deniers that lose at the end, only afraid from burial and cremation. You all are born with the intuitive to not bury, who diluted and manipulated you to accept Burying and Cremation, be proud of it and continue practicing it but your deceivers, controllers, son of snakes, and those whom you trusted following their misleading and end damned ways. You all ought once to listen to the two authors of the 11th commandment, yes, you heard it right, and to maybe win some day but wait no one can ever reach the end without this 11th commandment. The body and the mind are Immortal. Stop talking rubbish, nonsense, stupid remarks stop insisting the opposite as deniers, looters and new age atheists. Your science cannot ever prove any opposition to this or that; can never be validated against the 11th commandment. Yes, the 11th commandment is far more important and authentic than the physics of the double slit experiment and Einstein theory of special and general relativity or Leibniz Monads and the mathematics of data structure, or Hamiltonian Mechanics. However, it insists to let them fly and go as further than where they want to reach ever as long as you observed its commandment. This commandment also denies any masks unless the mask wearers denied other authentic commandments let alone the 11th, and the 11th commandment does not judge something outside of its domain but let it flourish, infact the sky is blue, one plus one is two and burial is false.

"This debate is to defeat the opponants of the 11th commandment. To present evidence of its obvious truth and geniunity that cannot be, denied left alone, neglected and who knows its ugly consequences which start to appear everywhere. A chance for opponants and all to annouce this infallible truth to the whole world, to act according to its premises. Untill now I am the only winner in this debate and you all are lossing in this debate with God using the wrong formula of burying and crimation"
