Abstract: The 20th century was a giant laboratory of man- made wars, genocide and assassinations of thought leaders. This paper explores government sanctioned intelligent homicide (GSIH) of James Forrestall, JFK, RFK, MLK, John Lennon, Stanley Kubrick and Princess Diana that shadowed major wars and terror in the last century. The signature traits of GSIH include a sudden death of a thought leader yet the criminals would never face justice despite scientific evidence: medical evidence incompatible with official narrative, lost or falsified records, altered crime scene evidence, sudden suspicious deaths of key witnesses, cover up and, numerous mechanical mishaps or human errors. A new forensic tool can accurately differentiate GSIH from ordinary crimes and may help combat GSIH a man -made menace for humanity that can be eradicated by scientific measures.

DISCUSSION

The assassination of James Forrestal at the Bethesda Naval Hospital was the 1st. Government sanctioned intelligent homicide of the 20th century. We may never know the precise reasons that led President Truman authorize the murder of the first secretary of war yet the missing pages of Forrestal's diary suggest t., Trumans lack of involvement with the Manhattan Project and the nuclear bombs, no written orders from the president, omission against the recommendations of the Joint Chiefs that the atomic bombs were not necessary for by November 1st, 1945 the Japanese would surrender.

Evidence also suggests, George Washington was a slave owner, Armenians, Jews, Vietnamese and Palestinians have been victims of genocide., the Second World War was unnecessary and the worst Holocaust of 72 million people by Stalin, Churchill, Hitler, Roosevelt, Hirohito, Mussolini failing to find a diplomatic solution for a European conflict, Roosevelt had foreknowledge of Pearl Harbor., Truman never authorized the unnecessary Hiroshima and Nagasaki bombing of civilians because the war was already won, JFK, RFK, MLK John Lennon were victims of the 1963 Coup D'etat by LBJ and CIA to declare war on Vietnam, Neil Armstrong did not see any stars from the moon because he was never there, and Bush JR nuked New York on 911.

GSIH represents a serious threat to human progress and democracy. Advances in forensic sciences have enabled us to differentiate GSIH from ordinary crimes.

What can we do to combat GSIH?

Education, education, education.

We have been fooled by our own presidents for a long time but as Abe Lincoln observed "You cannot fool all the people all the time."

The following steps may represent progress..

1. UN resolution to declare government sanctioned intelligent homicide, a crime against humanity.
2. Nobel Peace award for researchers.
3. GSIH In textbooks.
4. Evidence based official narratives of wars and catastrophic events.
5. Evidence based textbooks, museums and libraries.

CONCLUSION

GSIH Is a man -made menace for humanity that can be eradicated by scientific measures.
